EDITO

Dear Colleagues,

On behalf of the European Society of Digestive Oncology and the Local Organizing Committee, it is our great pleasure to invite you to the 10th ESDO Masterclass which will be held in Nantes, France, on the 19th & 20th of June 2026.

This Masterclass will be focused on the most recent advances in Digestive Oncology, with a particular emphasis on the novel approaches, especially concerning treatments including immunotherapy, targeted therapies, radio-nuclide therapies and personalized treatments, as well digestive cancer prevention.

The meeting will include both, fundamental and clinical sessions, aiming at better understanding of the mechanisms that govern digestive carcinogenesis and anti-cancer therapy, and will be based on interactive, multidisciplinary sessions, during which the latest knowledge and experience will be shared among the Scientists and Clinicians involved in digestive cancer patients' management, with participation of the most prominent European experts in the field.

We are convinced that this will be an important educational and scientific event and we hope to welcome you in Nantes on this occasion,

**Prof. Tamara Matysiak-Budnik, Prof. Yann Touchefeu,
Prof. Eric Van Cutsem, Prof. Thomas Seufferlein**

The Organizing Committee thanks all of its partners:
